PROFESSIONAL SUMMARY

Final-year Information Technology student (GEC Gandhinagar, 2026) with experience in full-stack development, machine learning, and product development. Delivered 5+ client projects, co-founded Clueless Builders, contributed to an SSIP-selected innovation project, and built applications ranging from mobile products to an Exoplanet Detection system using NASA Kepler datasets. Passionate about creating scalable software solutions and exploring the intersection of artificial intelligence, software engineering, and space technology.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C++, SQL

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Authentication Systems, System Design Basics

Databases: MongoDB, PostgreSQL, Supabase, MySQL

Mobile Development: React Native, Expo

ML & Data: Scikit-Learn, Pandas, Data Analysis, Feature Engineering

Tools & Platforms: Git, GitHub, Vercel, Postman, Figma, Docker, AWS Cloud Foundations

WORK EXPERIENCE

Clueless Builders

2025 – Present

Co-Founder & Developer

- Co-founded a startup focused on building innovative web and mobile products.
- Developed **StoryTrail**, an interactive storytelling platform with dynamic branching narratives.
- Built **OneQuestion**, a cross-platform daily journaling app (Expo + Supabase); published on the Apple App Store.
- Implemented Google Authentication across multiple web and mobile applications.

Independent

2024 – Present

Freelance Software Developer

- Delivered 5+ client projects including business websites and custom digital solutions.
- Integrated authentication systems, databases, and deployment workflows for scalable client apps.
- Collaborated directly with clients to gather requirements and deliver production-ready solutions.

CreArt Solutions, Ahmedabad

Sep 2022 – Oct 2022

Python Programming Intern

- Built a basic email application and strengthened Python programming and problem-solving skills.
- Gained practical experience in software development fundamentals and application logic.

PROJECTS

SSIP Innovation Project: [PortfolioBrief](#) | *Next.js, Tailwind CSS, Node.js, MongoDB*

- Developed a personalized stock news aggregation platform selected under the SSIP innovation program.

- Built a full-stack web app with user authentication, personalized content delivery, and modern UI/UX. [\(Link\)](#)

Exoplanet Detection | *Python, Scikit-Learn, NASA Kepler Dataset*

- Built an ML pipeline to detect exoplanets from NASA Kepler telescope light curve time-series data.
- Applied feature engineering, 1D-CNN model training, and EB rejection; deployed live via Streamlit. [\(Live Demo\)](#)

OneQuestion | *React Native, Expo, Supabase*

- Cross-platform journaling app with daily reflection prompts; secured data using SHA-256 hashing.
- Published the initial version on the Apple App Store with Google Authentication integration.

StoryTrail | *Next.js, Supabase*

- Developed an interactive storytelling platform with branching narratives and immersive user experience.
- Focused on responsive design, scalable frontend architecture, and dynamic story path exploration.

EDUCATION

Government Engineering College, Gandhinagar

Bachelor of Engineering in Information Technology (Ongoing)

India
2026 (Expected)

R.C. Technical Institute

Diploma in Computer Engineering, 9.27 CGPA

India
June 2024

CERTIFICATIONS & TRAINING

- AWS Academy Cloud Foundations
- AWS Academy Data Center Technician
- Advanced Machine Learning, Deep Learning & Artificial Intelligence
- Java OOP: Object-Oriented Programming with Exercises

EXTRACURRICULAR & ACTIVITIES

- Participated in Buildspace and multiple hackathons, building AI-powered and full-stack apps under time constraints.
- Volunteer at Invincible NGO; completed the Kedarkantha Trek.
- Interests: Artificial Intelligence, Software Engineering, Space Technology, Astronomy.
- Languages: English (Professional) | Hindi (Fluent) | Gujarati (Native)
